

PT1/10

SCIACQUATRICE SEMI-AUTOMATICA ROTATIVA
SEMI-AUTOMATIC ROTARY RINSER
RINCEUSE SEMI-AUTOMATIQUE ROTATIVE

PT1/10

Sciacquatrice semi-automatica rotativa.

Principali caratteristiche tecniche

- Sciacquatrice semi-automatica a 10 posizioni, con funzionamento ad acqua sterilizzata e scarico a perdere, costruita interamente in acciaio inox AISI 304.
- Quadro elettrico con circuiti a bassa tensione.
- Corredata di contenitore e cartuccia da 0,45 micron.
- Costruita a norme CE e montata su ruote.
- Disponibile anche nelle versioni a 20 posizioni con produzione fino a 1.200 bottiglie/ora.

Produzione

800 bottiglie/ora

Capacità di utilizzo

Bottiglie da 0,33 a 2 Lt

Dimensioni

67 x 67 x 75 cm
(lunghezza x larghezza x altezza)

Peso

50 Kg

Semi-automatic rotary rinser.

Main technical characteristics

- Semi-automatic rinser, use with sterilized water; 10 place, entirely made in stainless steel AISI 304.
- Switch board with low voltage circuits.
- Equipped with filter and cartridge 0,45 micron.
- Built in compliance with CE norms and mounted on wheel.
- Also available at 20 locations with production up to 1,200 bottles/hours.

Production

800 bottles/hour

Workable materials

Bottles from 0,33 to 2 Lt

Dimensions

67 x 67 x 75 cm
(length x width x height)

Weight

50 Kg

Rinceuse semi-automatique rotative.

Principales caractéristique techniques

- Rinceuse semi-automatique à 10 places à utiliser avec eau stérilisée sans récupération, entièrement en acier inox AISI 304.
- Tableau électrique avec circuits à baisse tension.
- Equipée de filtre avec cartouche 0,45 micron.
- Construite conforme aux normes CE et montée sur roues.
- Aussi disponible à 20 endroits avec une production de 1.200 bouteilles/heures.

Production

800 bouteilles/heure

Capacités d'utilisation

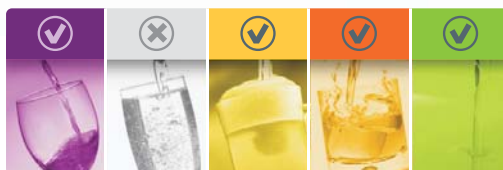

Bouteilles de 0,33 à 2 Lt

RINSING MACHINE - MODEL PT 1 -R

The semiautomatic rinsing machine mod.P T 1-R , with manual positioning and removal, works with the system of a recycle tank and a stainless steel pump able to be used for oenological and harsh products.

The machine allows to rinse the inside of new containers, before filling, in one phases :
with a recycled solution, filtered by means of a cartridge of 0,45 μm .

The recycle tank and the pump are mounted on the machine side, to allow an easy operation and washing.
The machine is mounted on wheels, with brake.
Built following the CE norm
Bottles glass.

Production: from 500 to
1.200 containers / hour
Electric power: 220V-1F – 50/60 Hz
Installed power: 0,55 kw
Machine dimensions: 1200 x 960 x h
750

Consumption: tank capacity : 30/40 L.

The machine is totally built in stainless steel AISI 304 and with plastic materials in conformity with the specific directives
